

brupower

De brusselse burger-energiecoöperatie

La coopérative d'énergie citoyenne bruxelloise

Brussels' citizen energy cooperative

One campaign, two objectives

Citizen fundraising: €150,000

**Investissez dans
une énergie aussi
bruxelloise que
la file chez Frit Flagey
un dimanche**

Dès
500€

Increase the number of energy-sharing customers:
100 new customers

**Quand l'énergie
vient de Bruxelles,
pas de stuut
sur vos factures**

ÉNERGIE
LOCALE

Brupower, an energy cooperative

100% citizen-run.

100% renewable.

100% from Brussels.

An energy cooperative

100% citizen-run.

> 578 cooperative members

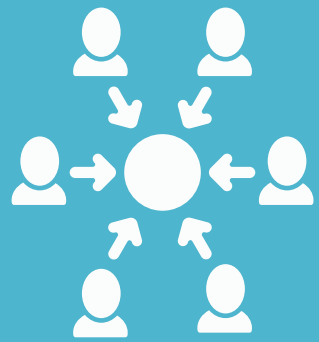

20 volunteers

3 employees

An energy cooperative

100% citizen-run.

Citizens buy one or more shares in the cooperative

With this money, Brupower buys solar panels for condominiums and public buildings! Citizens therefore become co-owners of the solar panels.

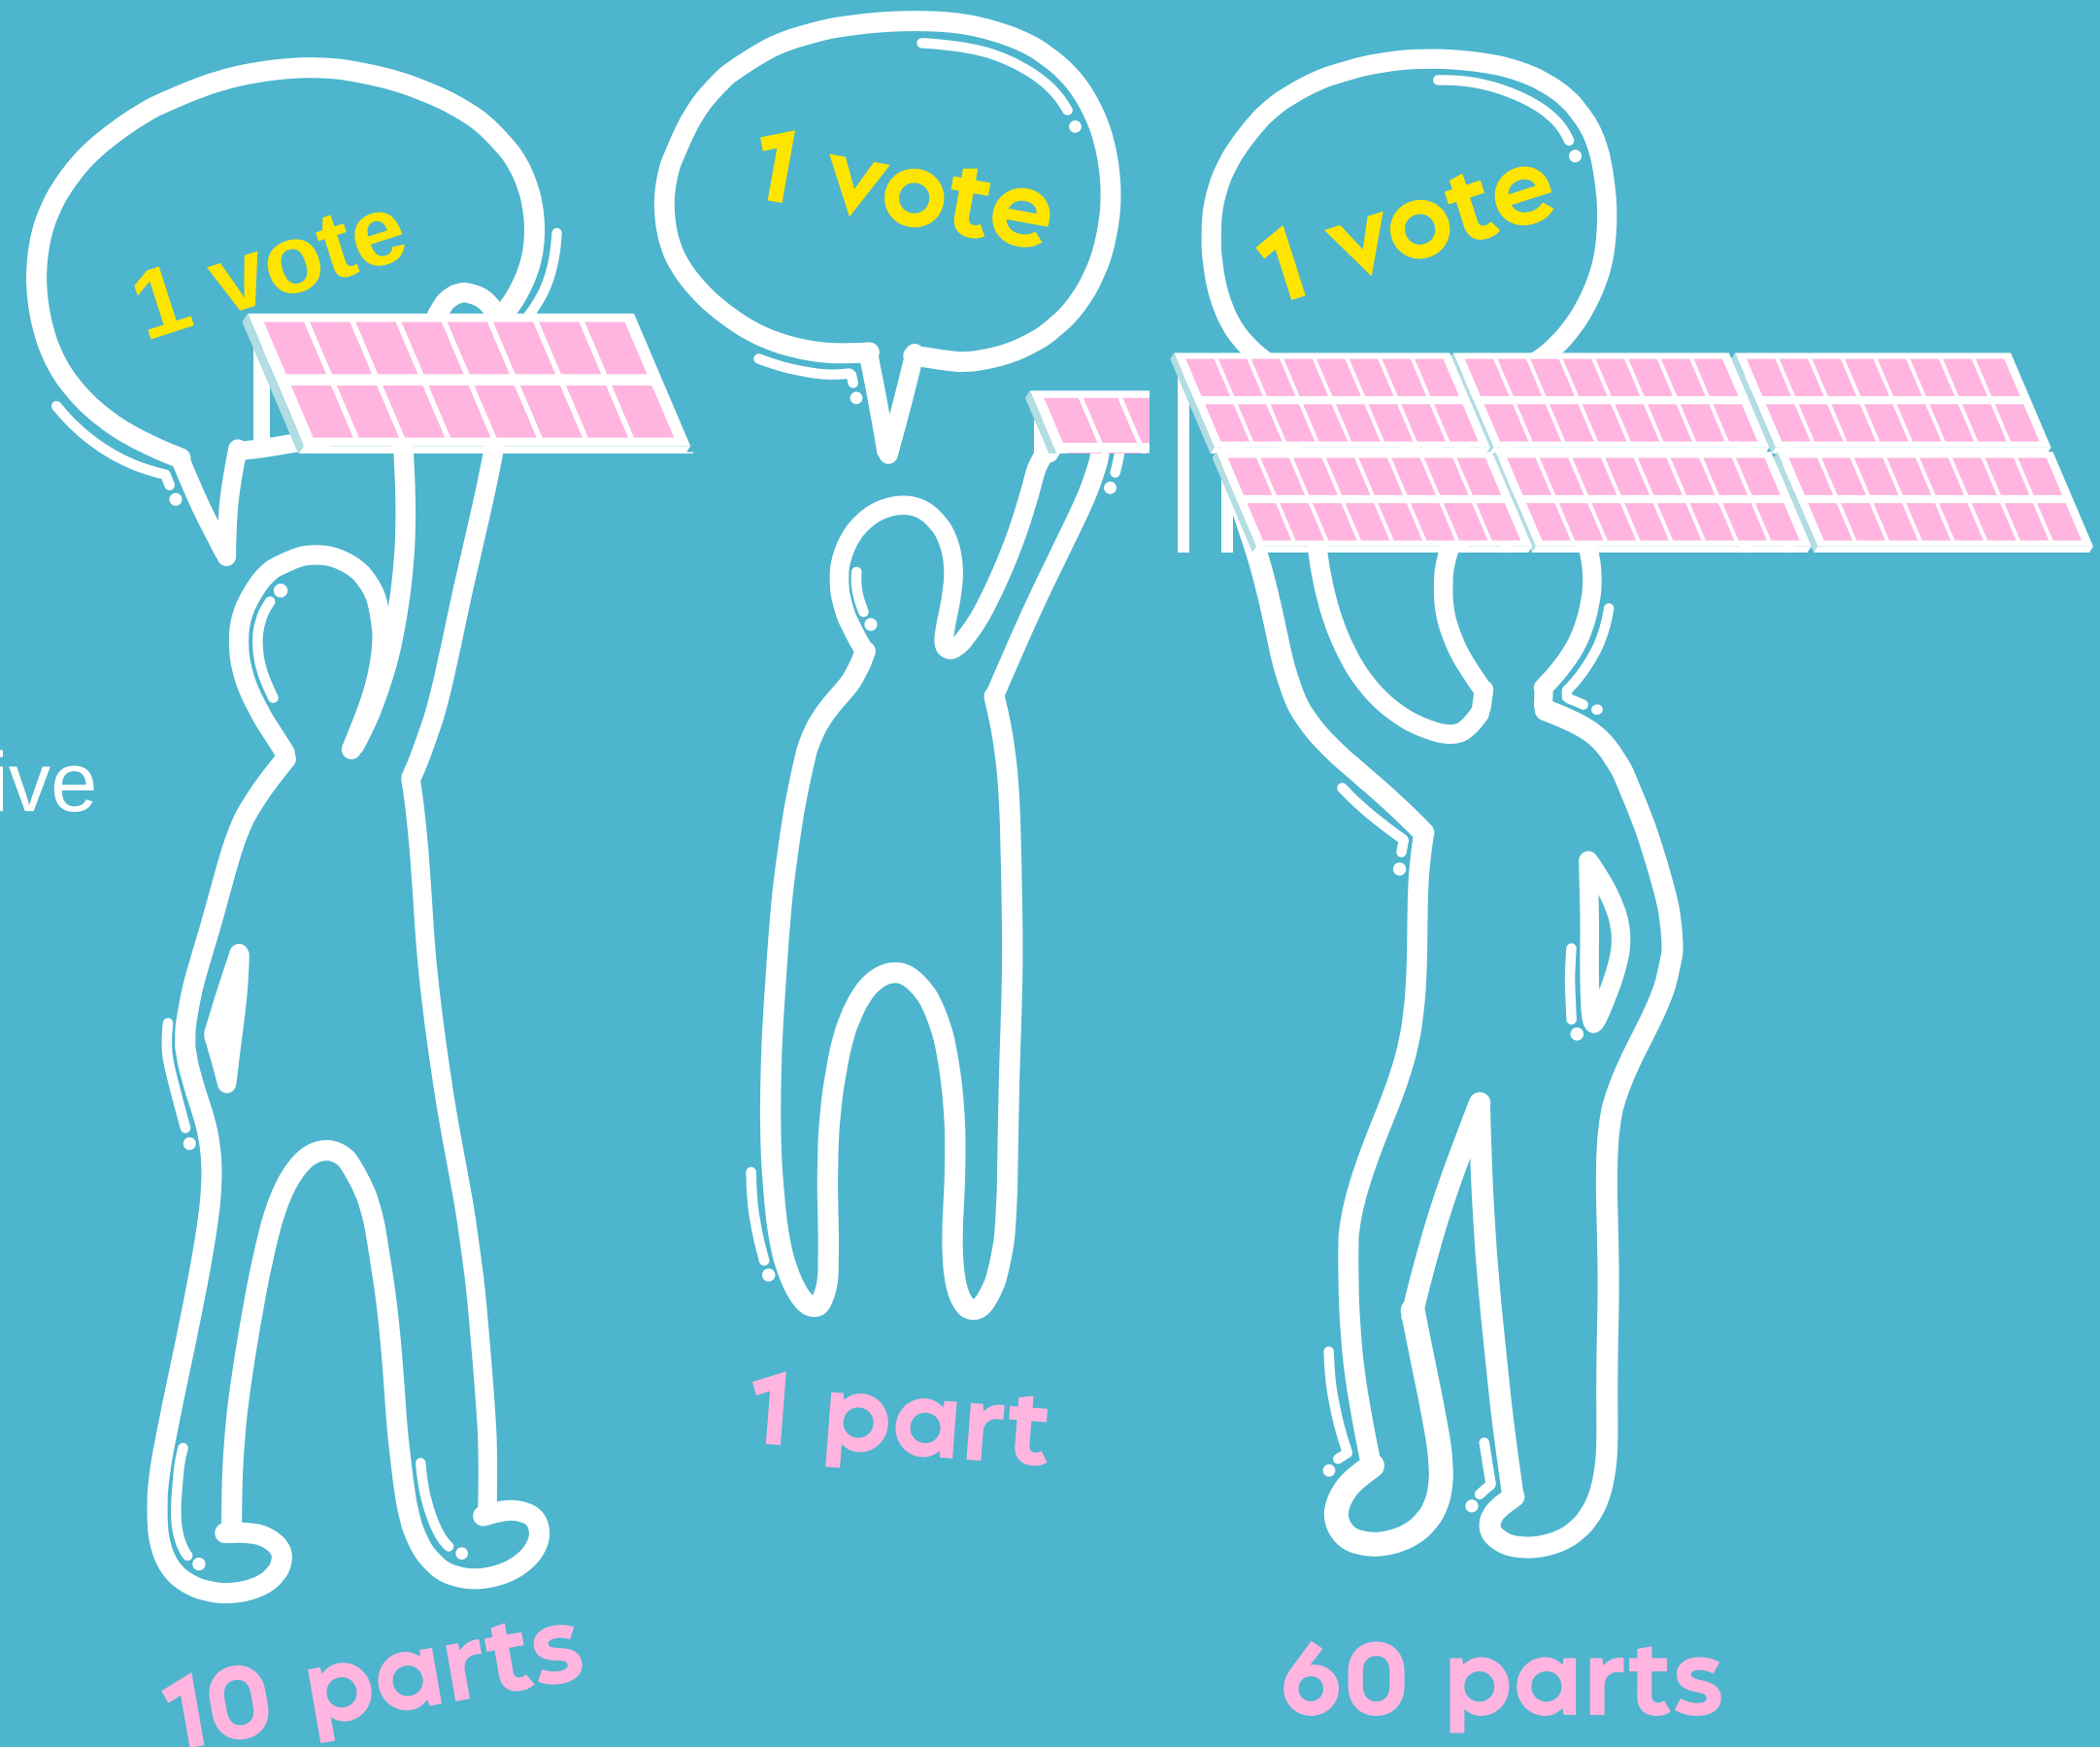

As co-owners, they are also part of the energy community.

They can therefore buy the self-consumed energy at a good price!

Each member of the cooperative has one vote at the General Assembly, regardless of the number of shares they own. **Major decisions are made collectively.**

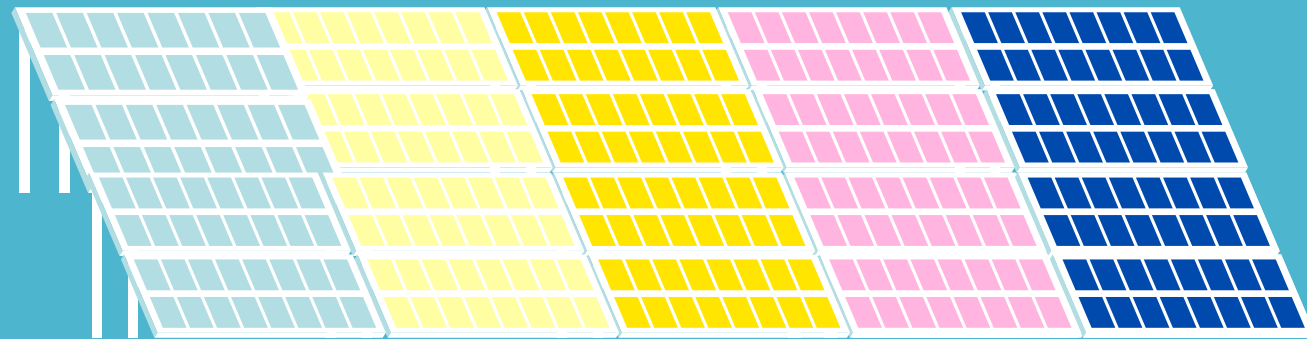

In addition, Brupower...

- Organizes awareness workshops... to share best practices for better consumption
- Organization of information and animation events... around the issues of renewable energy.
- Organize lots of fun events, like the bru'pop!

What energy?

100% renewable

**Today:
solar energy**

SeaCoop

**Future: offshore
wind energy + ...?**

Because brupower wants to become an energy supplier in the future!

Our solar projects

20 projects in production

Installed capacity: 728 kWp
Shared power: 330 kWp

new projects await us

+ 1 MWp more by 2028

Target 2026

To finance our solar projects

Investing in Brupower solar panels

**Votre
investissement
se voit.**

Projet DoucheFlux
Anderlecht

Dès
500€

3 high-impact outcomes

Your investment finances Brussels solar projects and strengthens energy carried by a citizen community.

1

Invest according to your means

Take one share (€50) or several shares in the cooperative and become co-owner of solar production facilities in Brussels.

2

Your money moves your neighbourhood forward

It supports concrete solar projects and strengthens energy designed as a common good.

3

Participate in decisions and future investments

As a co-operator, you have your say on priorities, new projects and the use of profits.

Your investment takes shape **on the rooftops of Brussels.**

Your investment finances solar projects on schools, public buildings and places useful to Brussels residents.

19+ solar projects in production

Visible projects, near you, in all 11 municipalities of Brussels.

€500 can generate up to €1,500 of local impact

More panels installed, more energy produced, more impact for Brussels.

Energy owned by its members

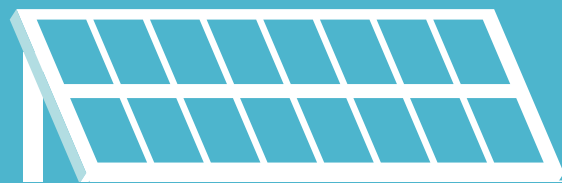

Energy that belongs to people like you.

What does a share represent?

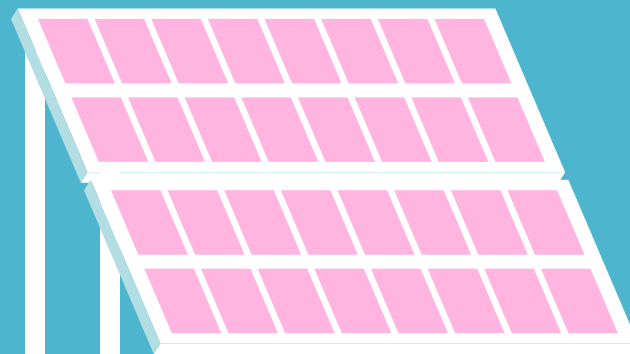

A piece of panel
= 1 part

50€

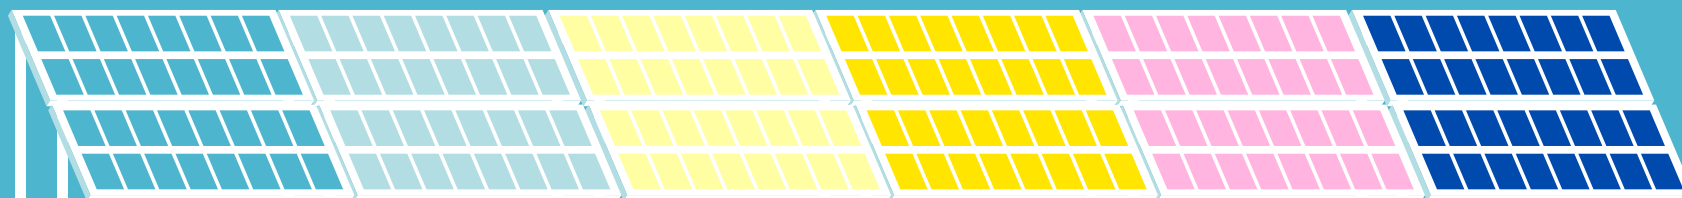

An entire panel
= 10 parts

500€

A large sign
= 20
parts

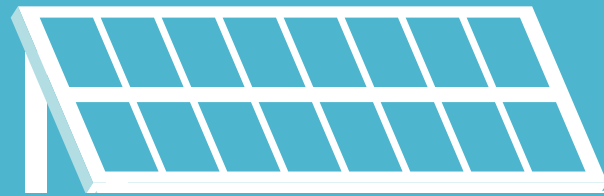

1000€

an entire installation
= 100 - 300 parts

5000 -
15.000€

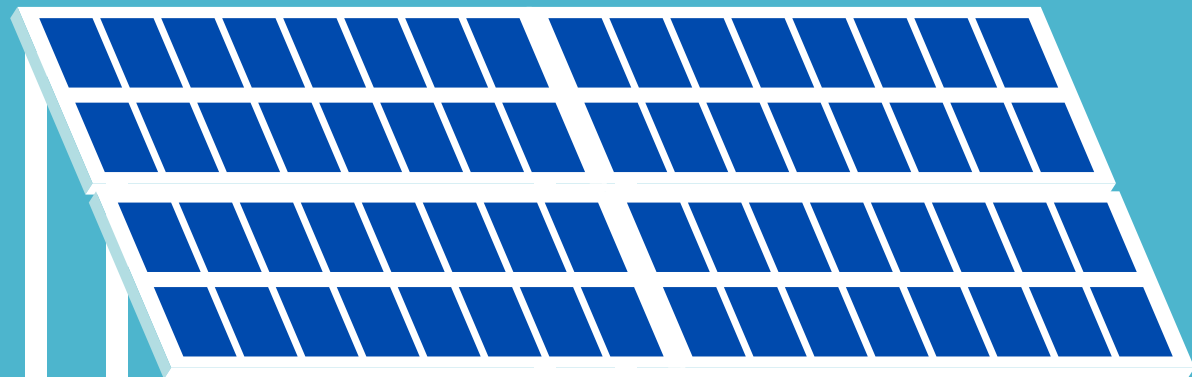

Brupower recommends that INDIVIDUALS invest in at least 1 small panel

= 10
parts

500€

And recommends that LEGAL ENTITIES invest in at least 2 large panels

= 40 parts

2000€

Receive Brupower electricity

**Optez pour une énergie
solaire, même sans
panneaux sur votre toit**

Copropriété Vanderkindere - Molenbeek

**ÉNERGIE
LOCALE**

How it works

You keep your supplier. We simply add local energy.

1

Join brupower

Take a share (from 50€) and become a cooperator and co-owner of energy produced right here, in Brussels.

2

Activate your smart meter

If not yet done, it's time to install a smart meter (free with Sibelga). Already have a meter? Then go to step 3.

3

Consume Brussels electricity

Fill in the online form. When the sun shines, you use Brupower's local energy.

You'll feel it on your bill too.

Fewer surprises, more control.
No sneaky price hikes.

Up to **105 €** savings per year.*

A bill that stays under control.

A clear price, from start to finish.

11 c€/kWh for energy

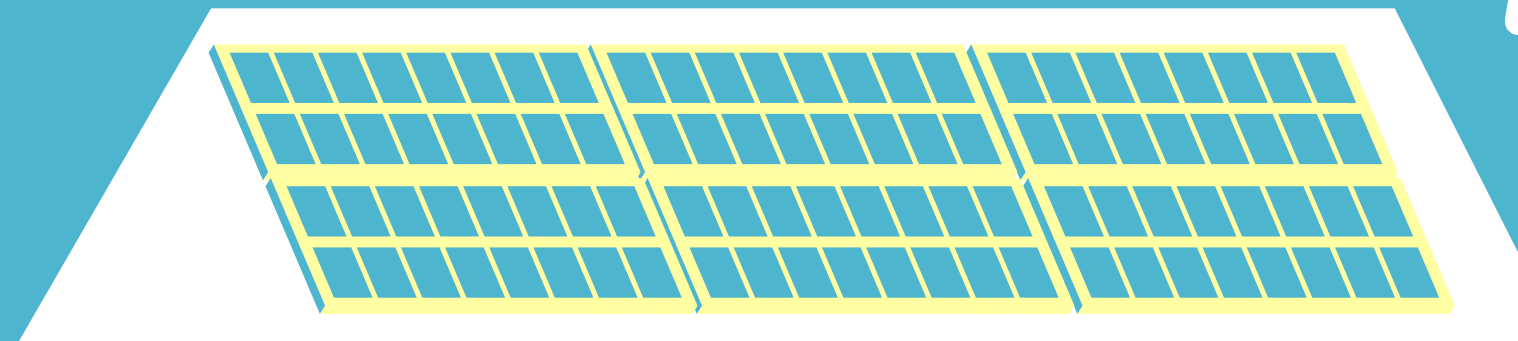

Pas besoin de changer de fournisseur : vous conservez votre fournisseur d'énergie actuel et commencez dès maintenant à profiter des avantages de brupower.

*estimate based on average consumption

How does “energy sharing” work?

Rooftops are made available by private individuals or public entities.

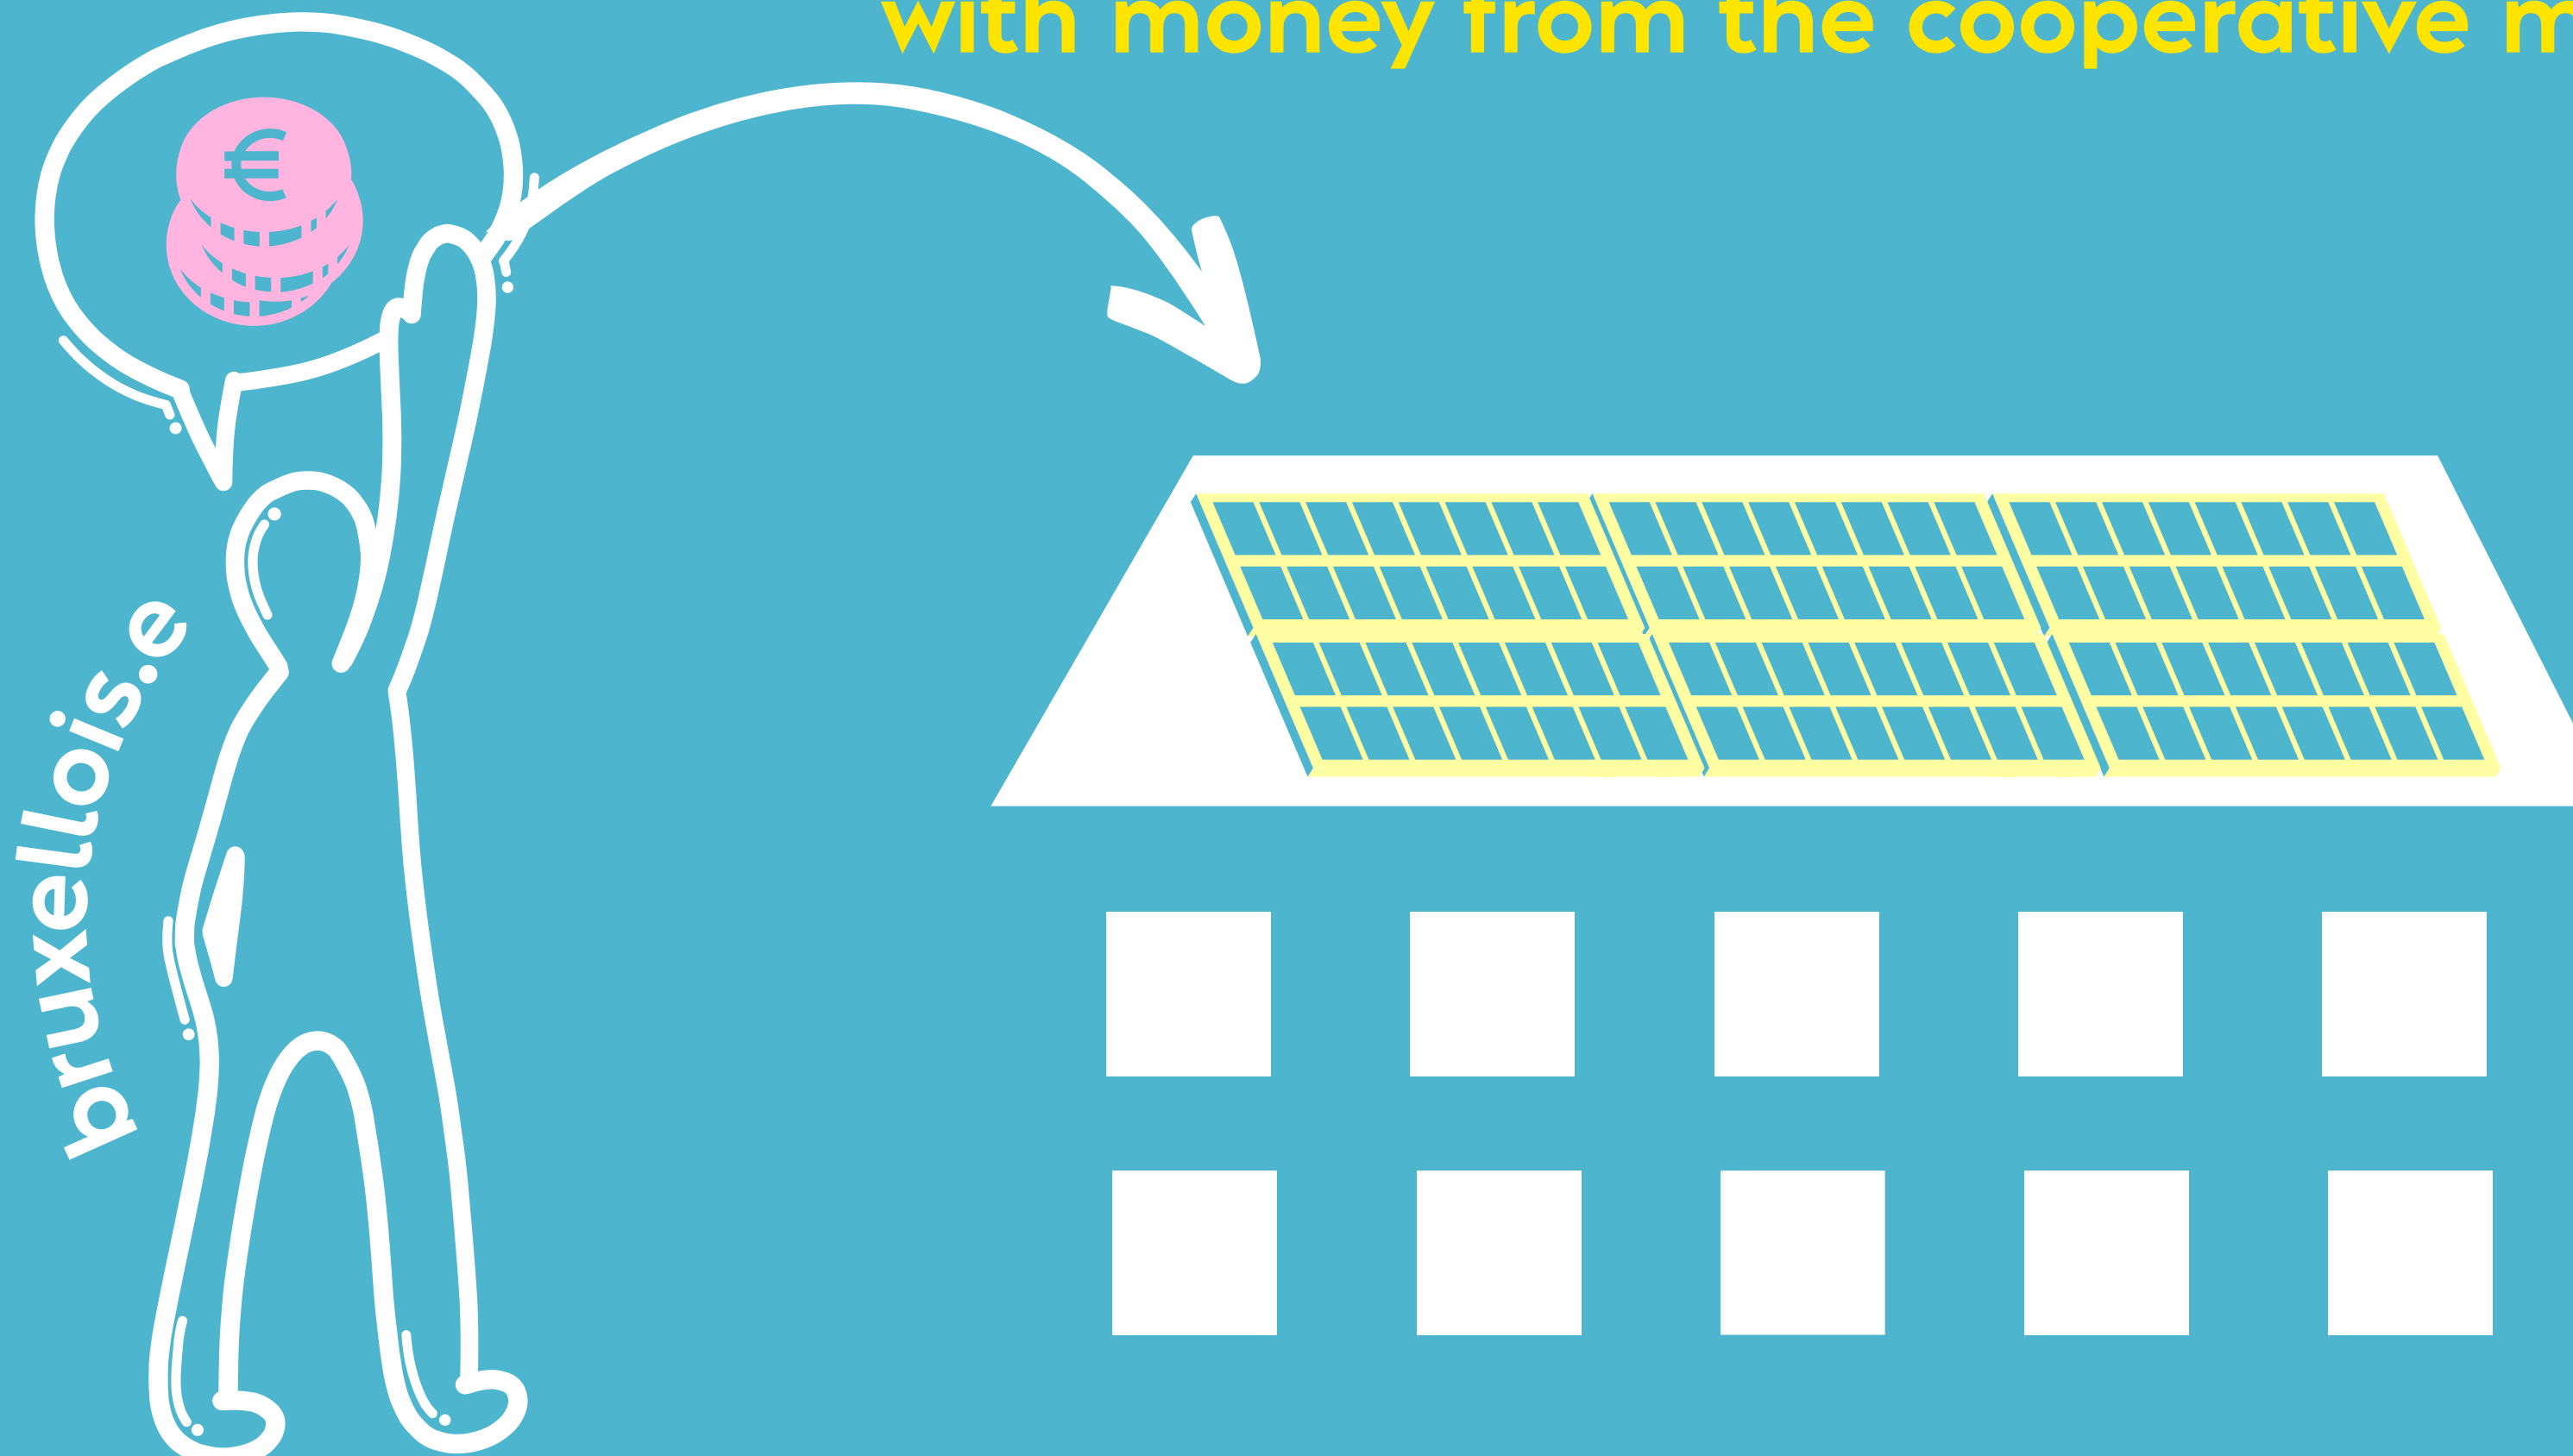

You too can offer your roofing services!

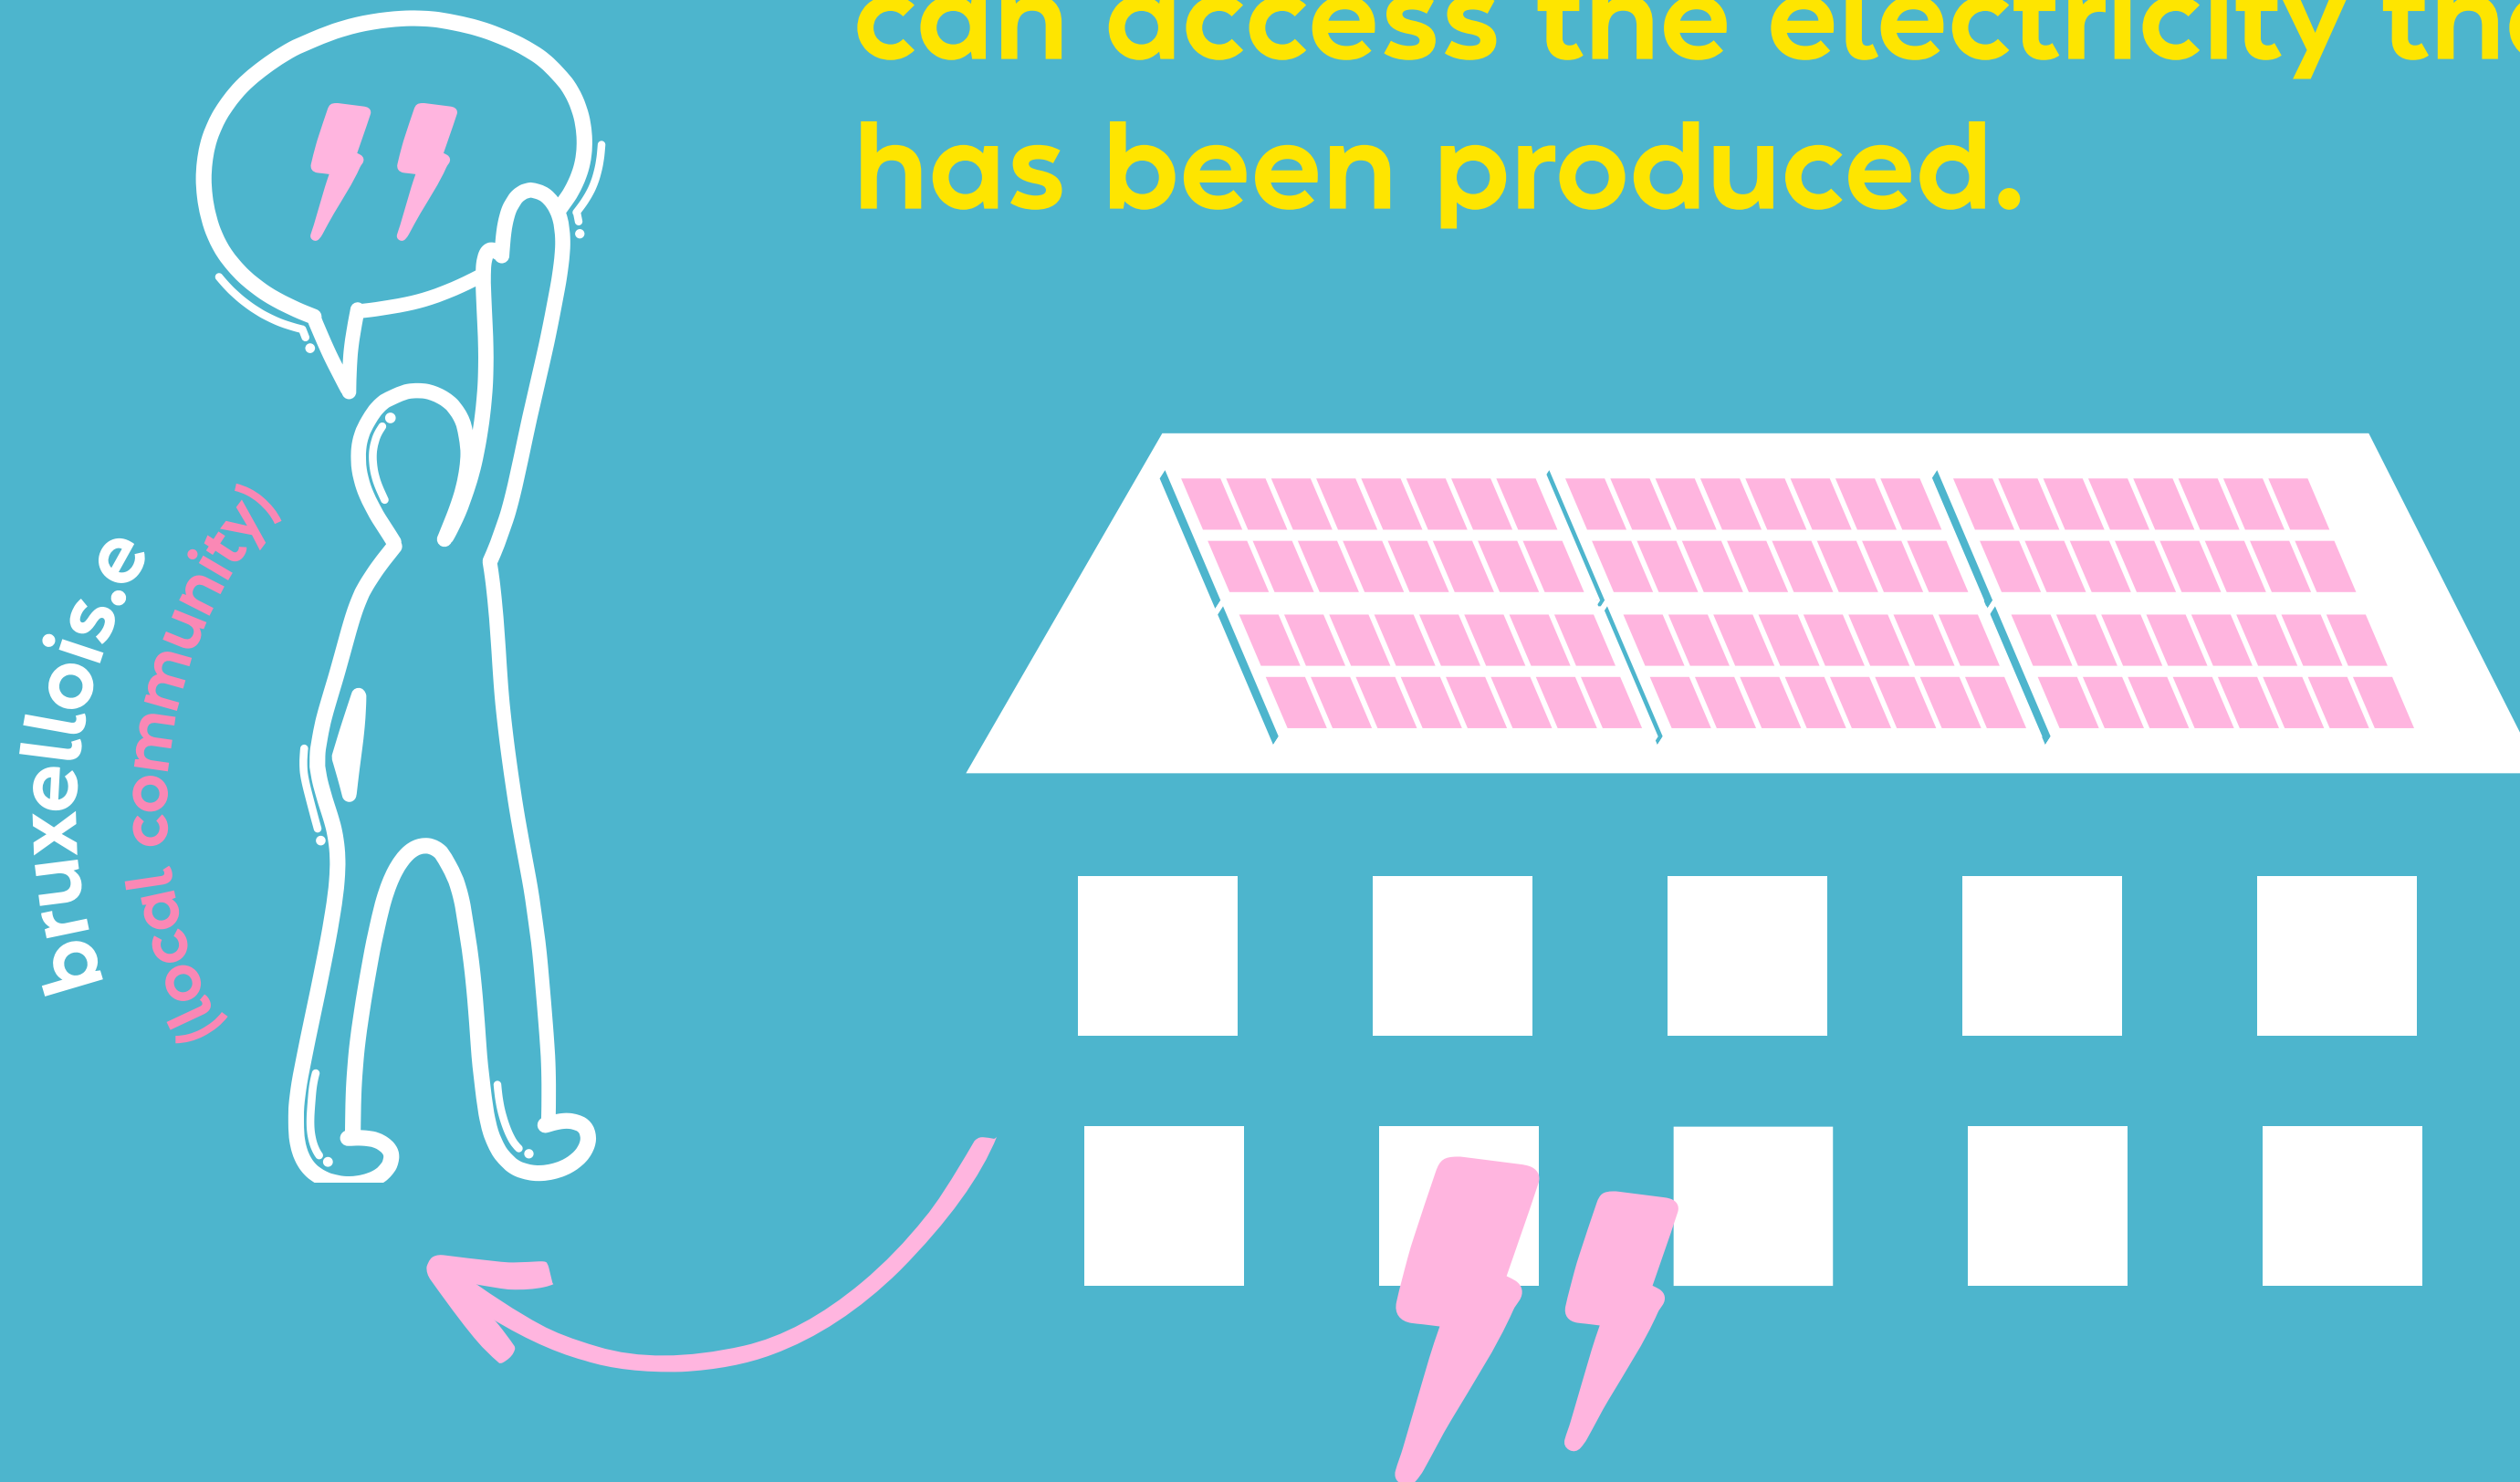

hello@brupower.be

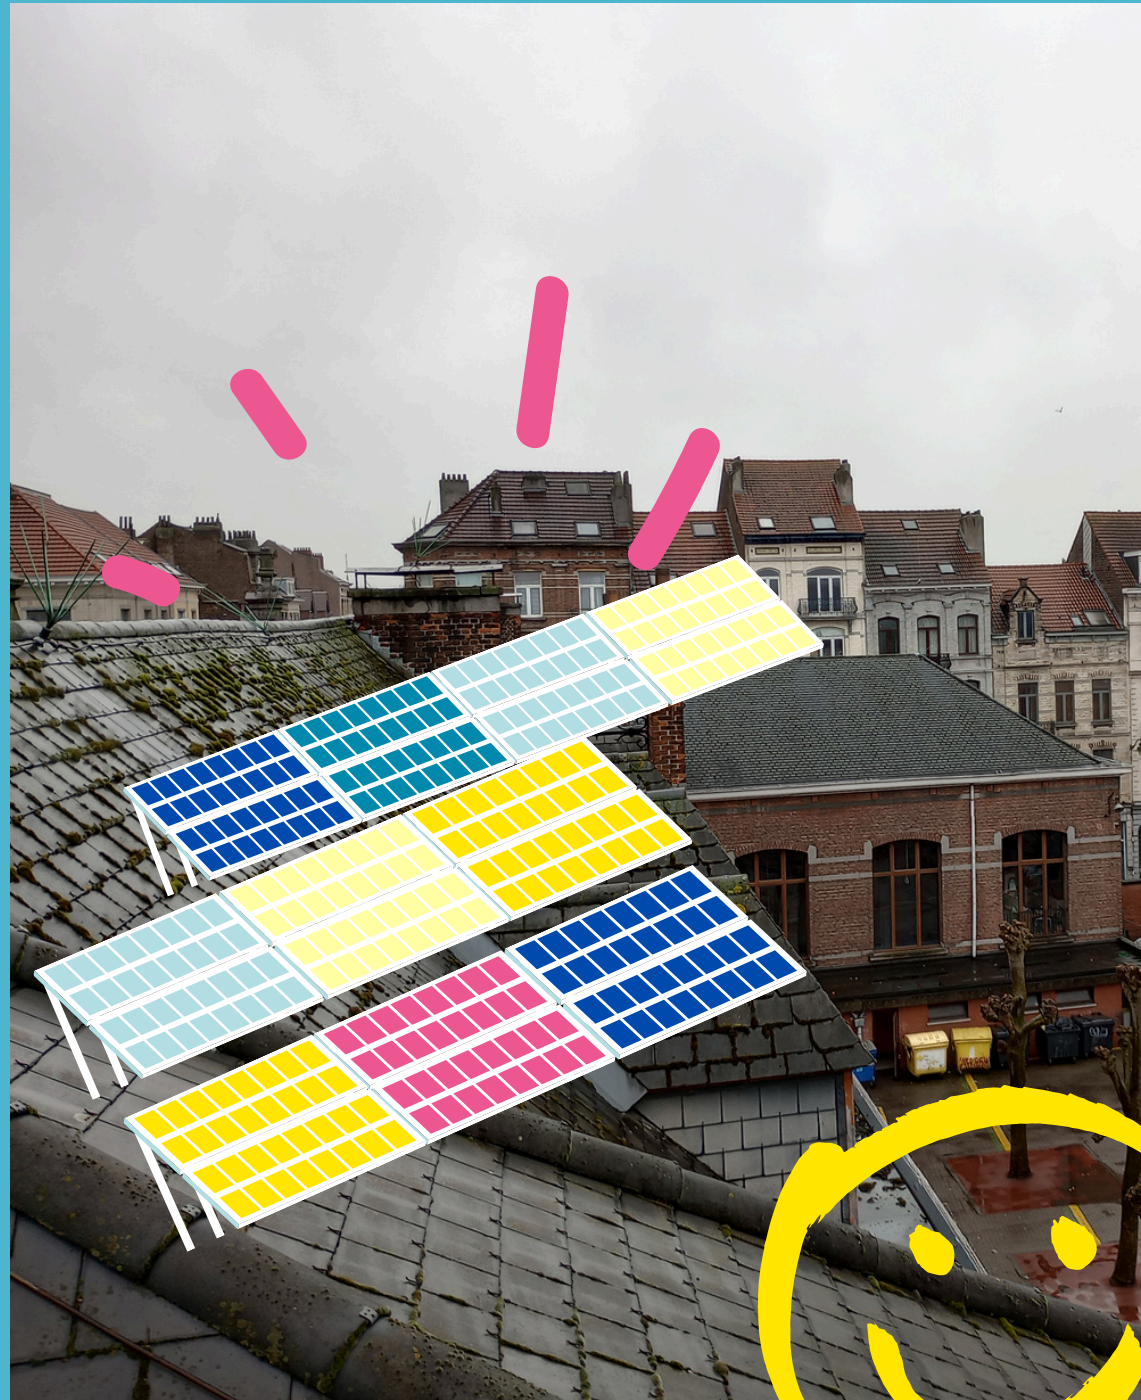

Brupower is investing in production.
with money from the cooperative members

Brupower cooperative members
can access the electricity that
has been produced.

Benefits of sharing

**Let's reduce our CO2
emissions and energy
bills together**

How can I get involved in Brupower?

By becoming a
cooperator and
joining the sharing!

By
participating
in a working
group

Communication,
projects, movement,

By becoming
an
ambassador

Organize information
evenings

Raising awareness
among roof owners to
join Brupower
